

如果引用的两个dll 的命名空间都是 System.Drawing.Imaging;

比如

a. dll 里面有 System.Drawing.Imaging;

b. dll 里面有 System.Drawing.Imaging;

那么可以 用 extern alias

如:

```
extern alias CoreCompatSystemDrawing;
```

```
using CoreCompatSystemDrawing::System.Drawing.Imaging;
```

```
r:GridV1=grid.dll
```

```
r:GridV2=grid20.dll
```

```
extern alias GridV1
```
